**Subject:** THANK YOU!

Kristen,

On behalf of the Office of Leadership and Experiential Learning and the Sloop participants, thank you again for giving your time to attend and present at the 19<sup>th</sup> Annual Sloop Institute for Excellence in Leadership! The students really appreciated your dedication to developing and knowing them. After reading the reflections, the students said that your presentation was “engaging,” “motivational,” and “relatable.” Your story made your presentation come alive and made some of the student’s even tear up. You made them realize the extent to which they have the potential to make an impact in someone’s life. The students expressed how not only your presentation, but also just you in general, left an impression on them that they will never forget. We hope that many of them responded to your call to action and that you are able to continue that connection with them.

Thank you again for your eagerness and availability in working with our Office and the wonderful blog post you wrote about the Institute. It was so great to meet and work with you over this process, and we hope we will cross paths again in the near future!
